PROFILE

Can you ever have too much Adrenaline™? Not according to millions of runners. Our trustworthy “Go-To Shoe” is back again with the signature midfoot wrap, forefoot capture, and progressive support countless runners rely on and love. Whether you’ve worn it for years or are trying it for the first time, the Adrenaline™ GTS delivers the right amount of cushioning and support.

MIDSOLE

- Rearfoot HydroFlow® ST
- Forefoot HydroFlow®
- Full-length BioMoGo
- Progressive Diagonal Rollbar (PDRB®)
- Dual-density DRB® Accel
- Combination S-257 Cushsole

 **HYDROFLOW®** | Dynamic viscous fluid units for heel and forefoot enhance midsole cushioning—attenuating shock with industry-leading dampening and comfort.

 **BIOMOGO** | We’ve taken the long-lasting cushioning of our MoGo midsole and made it environmentally friendly. How, you ask? By adding a non-toxic, natural additive to the MoGo compound that encourages anaerobic microbes to munch away once it hits the landfill.

 **PROGRESSIVE DIAGONAL ROLLBAR (PDRB®)** | Our dual-density post is biomechanically engineered to allow for progressive pronation control and creates a smoother transition from the midstance phase into the propulsion phase.

 **DRB® ACCEL** | Enhances tunable torsion of the midfoot. Shank-like thermoplastic devices vary from single units of a set modulus, to dual-unit versions of varied modulus (tuned with higher stiffness for medial support, the lateral side less stiff to smooth the ride).

 **S-257 CUSHSOLE** | Durable, energy-efficient midsole compound utilized as an insole board for even more cushioning and flexibility.

OUTSOLE

- HPR Plus
- Forefoot Stable Pod Construction
- Blown Rubber Forefoot

 **HPR PLUS** | A higher durability, abrasion-resistant rubber outsole compound that wears longer.

 **ENGINEERED STABLE POD CONFIGURATION** | Midsole and outsole components are engineered to set the foot up in an efficient, balanced position from heel strike to toe-off, offering maximum stability and responsiveness.

UPPER

- Moisture-managing Element Mesh
- Synthetic Overlay Materials
- Moisture-managing Element Linings
- Internal Support Saddle

 **ELEMENT** | Upper technology featuring superior microfiber construction to provide weather protection in a light, supple, quiet fabric that doesn't sacrifice breathability, durability, or comfort.
